- CA-170-I-1** Credit BG. View looks south (174°) at Deluge Water Supply complex, including Water Pumping Booster Station (Building 4317) in foreground, with Deluge Water Storage (Building 4316) in background at right. Pole on roof of Building 4316 is a gauge board used to indicate water level in the reservoir. Structure in left background is Building 4311 (Well No. 2).
- CA-170-I-2** Credit PSR. View looks east (102°) at west side of water reservoir, Building 4316. Unicon Portable Hanger (Building 4305) appears in background. Ground features in immediate foreground are remains of pavement for parking lot near foundation remains of Building 4320.
- CA-170-I-3** Credit BG. Interior view of Building 4316, showing internal construction of water reservoir, roof, and monitor. View looks southeast (142°). The pipe which hangs from the roof structure and turns downward under the monitor supplies water to the reservoir; the plate suspended on chains beneath the pipe end deflects water stream so it does not erode the bottom of the reservoir. The intake pipe for the pumps is not visible in this view.
